

MYTOPO: NO-NONSENSE MAPPING FOR SERIOUS OUTDOOR BUSINESS

MyTopo's product and services have been fine-tuned based on more than a decade of feedback from professionals who rely heavily on maps in the field, from first responders and engineers, to geologists and foresters, to the most avid hikers and hunters. MyTopo's software is accessible, powerful and intuitive, and its printed maps are expedition-ready.

Terrain Navigator (TN) (\$99.00 per state) mapping software combines powerful tools and topographic mapping data in an easy-to-use program. Among the most popular features:

- Easily catalogued collection of USGS/US Forest Service Topographic Maps
- 1:24/25,000 (7.5 minute series), 1:100,000 and 1:250,000 scale. Alaska is (1:63,360 and 1:250,000)
- Search Capability: Quickly find the place you need by searching Geographic Place Names, Lat/Long or UTM Coordinates
- View and print Maps in 2D or 3D
- Seamless or With Map Borders: View and print map border information, or use the seamless mode to turn multiple maps into one.
- Create elevation profile for planning or reviewing hikes
- Measurements: Measure distances, areas, and elevation profiles instantly
- Drawing and Labels: Add marks, lines and routes on top of maps
- Print Map on standard desktop printers (up to 11" x 17")
- GPS Tools: Transfer data between your computer and virtually all GPS receivers. Connect a GPS to your PC to turn it into a moving map display.
- Work in virtually any coordinate system: NAD27, NAD83, WGS84; MGRS, UTM and Latitude/Longitude

Additional features available for Terrain Navigator Pro (TNP) (\$299.00 per state):

- Seamless, 1-meter resolution aerial photos: Use aerial photos the same way you use maps, including printing and adding annotations and downloading for use offline.
- 1 foot and 2 foot resolution for many urban areas
- Street Addresses: Quickly find and display street addresses on maps and aerial photos
- Geo-Pins: Organize documents (digital photos, spreadsheets, even web pages) by accurately placing dynamic shortcuts right on the map
- Geo-Tips: Automatically label maps and aerial photos with street addresses, coordinates, elevations, grades and areas
- GIS and CAD Export: Export Maps, aerial photos, elevation models and shapefiles to GIS and CAD programs including ArcGIS, AutoCAD, Microstation, MapInfo and Intergraph
- Print on large format printers

- NGS Benchmarks and up-to-date Recovery Sheets
- State Plane coordinates
- Advanced Tools including range rings by time and distance, area fills and line-of-sight height offsets
- Google Earth Interface: Add layers to maps and photos and view them in Google Earth
- Public Land Survey System overlay for western states
- Township and Range Search/Overlay

US Streets Module (\$299.00) is a module for Terrain Navigator Pro that overlays streets and street names on aerial photos and topographic maps; display and print routes and driving directions; calculate estimated driving time and distance:

Team Tracker (MSRP \$599.00) is a module for Terrain Navigator Pro that allows the software to become a tracking center for field operations, plotting the exact location of GPS microphone- equipped team members in real-time on topographic maps and/ or aerial photographs. Among the key features:

- Plot position of GPS microphone equipped team members from the base station
- Color code each team for easy tracking
- Read team relayed positions in real time or at pre-set time intervals—your choice
- Set alarms to notify base station if a remote unit has not checked in or moved in a set period of time
- Receive and display text message sentences relayed from remote units
- Log data received from remote units to view as a project post incident

Emergency Management Symbol Pack (MSRP \$299.00) is a module for Terrain Navigator Pro that installs a palette of hundreds of lines and symbols commonly used by first responders to allow field personnel with basic computer skills to add fire lines, Incident Command Center symbols, and other first response standardized symbols to topographic and aerial maps.

MyTopo Print-on-Demand Service: Since 1999, MyTopo has been a leading provider of navigation-ready maps with its innovative, online map design center. MyTopo provides high-quality, custom maps at an affordable price. Maps start at \$9.95. MyTopo invites you to tailor-make a custom-centered map for your next adventure.

- Durable, waterproof paper
- High-quality laminates
- Navigation-ready features
- Print and ship within 24 hours

MyTopo topographic maps are derived from data provided by the US Geological Survey, the US Forest Service, Natural Resources Canada, and its aerial maps are derived from imagery provided by the US Department of Agriculture.

MyTopo Online Maps: Print, save and annotate unlimited navigation-ready maps from your computer/printer for \$29.95 a year, or experience free browsing in a Google-maps platform.

MyTopo is a private company based in Billings, MT. MyTopo provides navigation-ready mapping services, data, and software for professional and recreational use with a focus on efficient delivery accompanied by exceptional customer service. For more information, call 877-587-9004 or visit MyTopo online at www.mytopo.com.
